Reasons for Allowance

1. Claims 4-10, 15-17, 19 and 20 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The cited prior art taken alone or in combination fails to teach the claims invention of multiple clients linked to a secure network that is supported by a knowledge database wherein knowledge analysis is customized to the client terminal focused on clusters defined by category to include prioritizing of key words that form the axis of the cluster when such cluster is created.

The closest prior art (Sundaresan et al, U.S. Patent 6,651,058) teaches an automatic mining system to discover terms that are relevant to a given target topic from a large database of unstructured information such as the World Wide Web. Sundaresan does not teach setting important words having priority in clustering at the creation of the cluster database and carrying out clustering to create an axis of cluster on the basis of the important words. The claimed invention improves utility of the clustering by customizing such clustering to the requirements of the client terminal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
